

MRCT Center Clinical Research Glossary CDISC Public Review Outreach Template

Thank you for your interest in the [MRCT Center Clinical Research Glossary](#) public review period with [CDISC](#).

To make our glossary as robust and widely accepted as possible we are joining the CDISC process that invites users to provide feedback on the plain language definitions.

The intended audience for the MRCT Center Clinical Research Glossary is:

- Patients, participants, caregivers, and the general public
- Research coordinators and related professionals who regularly communicate with patients and participants
- Medical writers and others who develop study materials for patients and participants

We would like the reviewers during the public review period to reflect and represent these user groups.

Can you help?

We'd love your help getting the word out about this public review opportunity.

Sample email:

Hello!

We have an exciting opportunity for you to contribute to the development of a plain language glossary of clinical research terms. [The MRCT Center Clinical Research Glossary](#) is being developed by the [MRCT Center](#) and the definitions are created by a whole team of dedicated volunteers including patients, advocates, research professionals, medical writers, and others. They are aiming to make the information understandable and useful to a wide audience.

A public review period is currently open through April 21, 2023, to collect feedback on the definitions.

We invite you to take a look at the review package and share your thoughts.

[Here](#) is the link to the public review package.

To guide you through the process, we have included a helpful [video](#).

For more information about the glossary, please click [here](#).

If you have any questions, please don't hesitate to reach out to the MRCT Center team: mrct@bwh.harvard.edu

Thank you for joining us in making clinical research more understandable and inclusive. We truly appreciate your support.
